

# Learn Arabic Numbers Bingo (Beginner)

## How to make:

2. Print off game cards and number cards on cardstock and laminate.
3. I have provided 2 different sets of number cards, depending on what you want your child to learn. If you just want your child to match the same numbers, just use the number cards, if you want your child to learn what the numbers represent, use the cards with dots representing each number.

## How to Play:

6. Hand each player a game card.
7. Put all the number cards into a bag or box.
8. Take turns picking a piece out of the bag. If the piece matches a square on your card, use it to cover that part of your game card. If it does not match, put it back in the bag.
9. The first person to cover all the squares on his or her card is the winner and can shout BINGO!
